

EMAIL MANAGEMENT

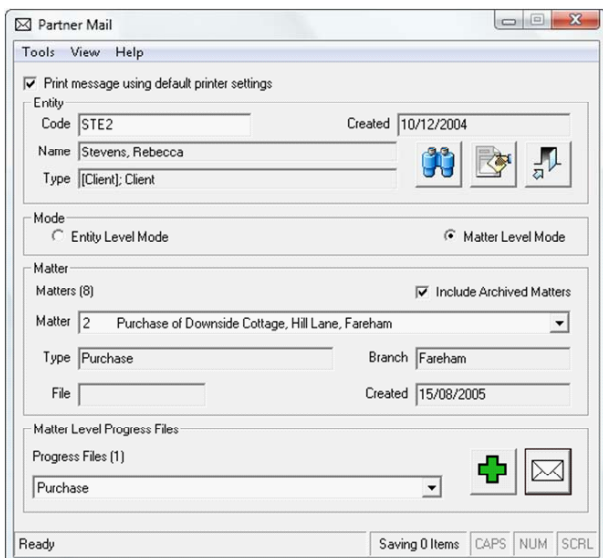

Use Partner for Windows PartnerMail to manage emails to and from your inbox to case

Email plays a large part in the busy worker's day and firms need to ensure that case related email correspondence is stored appropriately and easily retrievable. Partner for Windows PartnerMail is an easy to use plug-in to MS Outlook designed to improve the efficiency of transferring emails from MS Outlook to Partner for Windows Case Manager.

With PartnerMail installed, sent and received emails are easily captured in Partner for Windows Case Manager, which saves them in the database forever without concerns about MS Exchange being down or the emails being deleted. Further, when an email is received in your inbox, PartnerMail will try to cross-reference the sender's email address to your database and offer a short-list of potential matches to speed up the filing process. PartnerMail can ensure automatic capture of time spent working on emails which not only makes certain that time is recorded on a matter but also saves the fee earner having to manually input the data.

FEATURES

- Emails can be stored at either entity or matter level

- PartnerMail has a database search facility
- Personalise PartnerMail to suit your working practices
- Auto time record an email in or out or show the timer for user-intervention
- Filing can be set to either auto prompt or ad-hoc where the user chooses which emails to file and when
- Combine or separate multiple emails per case
- Warn your users when deleting an email that has not been filed in Partner for Windows Case Manager

ABOUT PARTNER FOR WINDOWS

Partner for Windows is a comprehensive practice and case management system including accounting, case and document management, time recording and billing which together form a complete system to meet the back and front office requirements of a modern legal practice.

The extensive functionality of Partner for Windows can further be enhanced using a range of specialist third party solutions designed to address key business issues for the legal profession. Each of these solutions is seamlessly integrated into Partner for Windows to ensure that the single practice and case management database remains at the core of the system.
